

Information Session Exporting from SCT Intermodal - Wodonga

Presented by SCT Logistics and DP World Australia

DP World Australia and SCT Logistics have joined forces to ensure an improved level of freight service is provided from the Albury/Wodonga region to Port of Melbourne, and to reduce truck dependency and protect environmental quality.

The two companies will work jointly to service regional trains providing exporters and importers direct access to the dock at DP World Australia's Melbourne Terminal.

This information session will provide a point of contact for local exporters and importers, government and transport providers. The session will also provide an insight into the opportunities available for customers within their supply chains.

SCT Logistics has now opened rail connectivity from Western Australia, Adelaide, Victoria into Bromelton, Queensland utilizing the new Wodonga facility as a central hub.

SCT Intermodal Wodonga is the rail hub to move freight both domestically and internationally.
